

62 **Floribunda Rose *Fashion***

Patented

Luminous Coral-Pink Suffused with Gold

The immense clusters of 20 to 25 delicately fragrant flowers are in bloom continuously from June until frost. The plant will reach a height of 2½ to 3 feet, is hardy and vigorous and requires a minimum of care. Fashion makes beautiful flower arrangements. \$2.00 each; 10 for \$19.50.

Floribundas require less care than most Roses. They can be used in foundation plantings, along walks, as hedges, or in the border. For continuous bloom from June until frost you can't beat them.

Other Floribunda Roses listed on pages 2 and 3.

QUALITY OF McARDLE'S ROSES

We believe you would prefer to pay the slight difference in price for the best in Roses rather than a lower price for inferior quality. The difference in satisfaction will be well worth while because of better flowering qualities. All McArdle's Roses are individually wrapped to insure you the best. Each plant is properly labeled so that any mix-up on varieties, which commonly occurs in mail-order houses, is carefully avoided. On the right is an illustration of one of our Roses packed in moist moss.

Grass Seed Especially Adapted to Greenwich and Vicinity

NEW MERION BLUE FORMULA. This is a mixture of grasses containing Merion Blue, Kentucky Blue, Fancy Red Top and Pennlawn Fescue. It was tried, tested, and proved to do very well in this locality. 2-lb. box \$2.95; 5 lbs. \$7.50; 25 lbs. \$35.00; 100 lbs. \$135.00.

Turfmaker

For the perfection lawn. Only the finest quality lawn grass seeds are used in this blend. Contains extra heavy Kentucky Blue Grass, certified Creeping Red Fescue and Merion Kentucky Blue Grass. Will grow in sun or shade. No. 1 can (covers 500 sq. ft.) \$1.79; No. 2 can (covers 2000 sq. ft.) \$6.65; No. 3 can (covers 12,000 sq. ft.) \$36.90; No. 4 bag (covers 25,000 sq. ft.) \$69.25.

Service Turf

A general-purpose blend that makes the kind of lawn that is a beauty to look at, while providing a durable carpet for any lawn activity. Ideal for play areas, sun, shade, terraces or poor soil conditions. Contains heavy weight Kentucky Blue Grass, Chewing's Fescue and Creeping Red Fescue. No. 1 can (covers 400 sq. ft.) \$1.25; No. 2 can (covers 1600 sq. ft.) \$4.49; No. 3 can (covers 9600 sq. ft.) \$24.75; No. 4 bag (covers 20,000 sq. ft.) \$43.85.

Park

Park is a quick-growing, economical mixture of grasses. We do not recommend it for permanent lawn areas, although it is often used for such. No. 1 box (covers 200 sq. ft.) 89 cts.; No. 2 box (covers 1000 sq. ft.) \$3.85; No. 3 bag (covers 5000 sq. ft.) \$15.40; No. 4 bag (covers 10,000 sq. ft.) \$28.50.

Asgrow White Clover

No. 1 can (covers 500 sq. ft.) 95 cts.; No. 2 can (covers 1000 sq. ft.) \$1.75.

Sunilawn

Although Sunilawn has a rougher texture than the higher-priced mixtures, we consider it very practical. It grows well under rough soil conditions and contains white clover, which we highly recommend. Use 6 lbs. per 1000 sq. ft. Lb. 85 cts.; 5 lbs. \$3.95; 25 lbs. \$18.75; 100 lbs. \$70.00.

Town of Greenwich Grass Seed Mixture For Sun or Shade

ESPECIALLY ADAPTED FOR THIS LOCALITY

This is the same formula that is used in the beautiful parks of the Town of Greenwich. Because of its high fescue content, it is adapted to shade and sun. Its velvety green color is outstandingly good, and its texture is very fine. The Illahee Creeping Red Fescue in this mixture helps fight crabgrass. The repeat business on this new mixture also indicates to us that those who have tried it are most satisfied with the results. Lb. \$1.00; 5 lbs. \$4.75; 25 lbs. \$22.50; 100 lbs. \$85.00.

Vaughan's Merion Blue Grass

Vaughan's Merion Blue Grass is a selected strain of Kentucky Blue Grass which is more resistant to heat and stays green more during the hot summer months. Another big advantage is that it is resistant to fungus diseases. Since the seed is high-priced and small, we recommend that you use a Vaughan's Merion Blue Grass Seeder. 1 lb. will sow 750 sq. ft. Lb. carton \$2.10; 5-lb. bag \$10.00; 10-lb. bag \$19.50; 25-lb. bag \$47.50; 50-lb. bag \$92.50; 100 lbs. \$180.00.

Vaughan's Merion Formula Master Blend

This is a mixture of the latest and best grasses containing at least 40% Merion Blue, Delta Kentucky Blue Grass and Pennlawn Fescue. A grass seed mixture is preferred because it is an added insurance for a good lawn. Each grass has its own particular likes and dislikes, so that by using a blend you make sure that at least one of the team will feel at home. Each grass also germinates at different rates of speed, and as a result the quicker growing grass nurses the slower growing grasses until they become established. This formula is 100% permanent. 1 lb. will sow 750 sq. ft. Lb. carton \$1.89; 5-lb. bag \$9.00; 10-lb. bag \$17.50; 25-lb. bag \$42.50; 50-lb. bag \$82.50; 100 lbs. \$160.00.

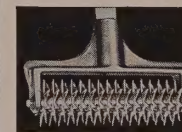

Plant WHITE CLOVER with Grass Seed

For sunny locations we recommend using 5 to 10% White Clover in a grass seed mixture. It stays green in dry weather and it helps to crowd out crabgrass. For best results use the new Wild White Clover, which is more compact and much more durable than the Common White Clover.

English Wild White Clover. Lb. \$2.00.

Common White Clover. Lb. \$1.75; 10 lbs. \$16.50.

New Tool Speeds Growth on Bare Spots in the Lawn

The Lawn Gardevator is a handy tool for patching up bare spots in your lawn area. You can break up compacted soil and soil crusts without injuring or tearing the turf, thereby preparing the area for reseeded. After seeding, roll the gardevator back and forth over the seeded surface. This insures good cover and prevents loss of seed from wind, rain and birds. Mr. McArdle classifies this implement as one of his favorite tools. \$5.95 each.

McArdle's Individual Grasses and Field Seeds

ILLAHEE CREEPING RED FESCUE. A permanent lawn grass that is particularly adapted to the shade. It spreads from the roots, making a dense turf which tends to crowd out weeds. Because of its deep roots, it is capable of standing dry weather. Grows well in sunny areas also. Lb. 90 cts.; 10 lbs. \$8.50; 25 lbs. \$20.00.

KENTUCKY BLUE GRASS. Used mostly as a lawn grass. A permanent type of grass that produces dense, tough sod of a deep green color. It is slow in becoming established. Lb. \$1.00; 10 lbs. \$9.50; 25 lbs. \$22.50.

FANCY RED TOP. A nurse grass that lives about three years on turf kept cut. It gives a fine texture the first year of growth and then becomes quite coarse during the second and third years. It makes quick growth and nurses the permanent grasses until they become established. Lb. \$1.00; 10 lbs. \$9.50; 25 lbs. \$22.50.

TIMOTHY. A tall-growing Meadow Grass used mostly for hay and pasture. Grows quickly. Lb. 40 cts.; 10 lbs. \$3.50; 25 lbs. \$7.50.

COLONIAL BENT. This permanent grass, very fine in texture, is similar to that used on putting greens. Spreads rapidly by creeping underground roots. Requires close cutting and plenty of moisture. Lb. \$1.50; 10 lbs. \$14.00; 25 lbs. \$32.50.

DOMESTIC RYE GRASS. Also known as Common Rye Grass. A quick grower often used in lawn grass seed mixtures as a nurse grass to prevent the soil from washing. Lb. 30 cts.; 10 lbs. \$2.50; 25 lbs. \$5.50; 100 lbs. \$20.00.

ORCHARD GRASS. A field grass used in pastures and meadows. Lb. 75 cts.; 10 lbs. \$7.00; 25 lbs. \$16.25.

PENNLAWN FESCUE. A creeping red hybrid Fescue bred at Pennsylvania State University. It provides thick green cover for shady places and sandy soils, and it shows excellent heat and disease resistance. Lb. 90 cts.; 10 lbs. \$8.50; 25 lbs. \$20.00.

PERENNIAL RYE GRASS. A short-lived perennial lasting three to four years. Used as a nurse grass in lawn seed mixtures and also in meadow mixtures for hay and pasture. Good for a temporary lawn. Lb. 40 cts.; 10 lbs. \$3.50; 25 lbs. \$7.50; 100 lbs. \$28.00.

POA TRIVIALIS. Rough-stalked Meadow Grass. This variety of Blue Grass is available again. Thrives in shaded lawn areas. Deep green in color. Lb. \$1.30; 10 lbs. \$12.50.

GRUBS OF JAPANESE BEETLE

H H Lawn Fertilizer 8-6-4 (With Chlordane)

Combination Lawn Food and Grub Killer. Saves time and labor. Feeds lawns as it kills beetle grubs, cut-worms, ants, etc. Use 15 to 20 lbs. per 1000 sq. ft. on established lawns, and 25 to 30 lbs. per 1000 sq. ft. on new lawns. 50 lbs. \$5.00; 500 lbs. \$47.50; 1000 lbs. \$90.00.

ITALIAN RYE GRASS. A good temporary grass to grow in shaded areas. It is coarse in texture, like the other rye grasses. Lb. 30 cts.; 10 lbs. \$2.50; 25 lbs. \$5.50.

CHEWING FESCUE. A permanent grass particularly adapted to the shade. The blades are very fine and wiry and are gray-green in color. Its deep roots and tough texture makes it a very hardy and durable grass. It will also grow in sunny areas. Lb. 75 cts.; 10 lbs. \$7.00; 25 lbs. \$16.25.

Miscellaneous Field Seeds

BUCKWHEAT. Use $1\frac{1}{2}$ to 2 bu. per acre. Used as a summer cover crop. 48 lbs. per bu. Lb. 15 cts.; bu. \$6.50.

SOYBEANS, Black Wilson. Black-seeded variety. Use $1\frac{1}{2}$ to 2 bu. per acre if sown broadcast. In this section used mostly as a cover crop for improving the soil. 60 lbs. per bu. Lb. 20 cts.; bu. \$9.50.

SEED OATS. Use $2\frac{1}{2}$ to 3 bu. per acre. Often used as a cover crop. 32 lbs. per bu. Lb. 15 cts.; bu. \$4.50.

SPRING RYE. Sow 2 bu. per acre. A valuable crop to plow under for soil improvement. Requires about three months to mature. 56 lbs. per bu. Lb. 15 cts.; pk. \$2.00; bu. \$7.00.

FIELD CORN, Hybrid U. S. 13. 1 peck per acre. Lb. 50 cts.; pk. \$4.00; bu. \$12.00.

Field Clovers

(60 lbs. per bu.)

Clovers are legumes. They take nitrogen from the air and put it into the soil and are, therefore, real soil improvers.

ALFALFA. A forage plant yielding an immense crop of hay. It likes lime. Sow 20 to 30 lbs. per acre. Lb. \$1.00; 10 lbs. \$9.50.

ALSIKE. A perennial Clover usually sown with other field grasses such as timothy and Red Clover. Excellent for pasturage or hay. Lb. 80 cts.; 10 lbs. \$7.50.

LADINO CLOVER. A large type of white Clover used in pasture mixtures for grazing, hay and silage. It is a good soil improver. When sown alone, 3 to 4 lbs. per acre is used. If sown with a mixture, 1 to 2 lbs. is recommended. Lb. \$1.75; 10 lbs. \$17.00.

RED CLOVER, DOMESTIC. One of the most nutritious of forage plants. If sown broadcast, 10 to 15 lbs. per acre is used. Lb. 90 cts.; 10 lbs. \$8.50.

In Seeding Sloping Areas— USE SALT HAY

Salt Hay is now used in the making of lawns on sloping areas or steep banks where there is danger of the seed and soil washing out from heavy rains. The Salt Hay is applied after the seed is sown and left until the grass begins to develop. At the same time it also shades the newly seeded area and helps to prevent the soil from drying out. For this same reason also Salt Hay is often used on level areas in late spring or early summer seeding.

Since it contains no weed seed, it also makes an ideal mulch for the garden. Widely used in rose beds and around tomatoes and strawberries. It not only keeps the weeds down, but also retains moisture in the soil. Bale covers approximately 400 sq. ft. \$4.95 per bale.

A Temporary Lawn of Domestic Rye Grass and White Clover

Where lateness of season, poor soil, or other conditions prevent one from making a permanent lawn, we recommend using a mixture of Domestic Rye 95% and White Clover 5%. Use 5 to 6 lbs. per 1000 sq. ft. When ready for the permanent lawn, this may be turned under. You thereby not only improve the physical condition of the soil by incorporating this green manure into it, but also increase the fertility content. Before reseeding permanently, apply a 10-6-4 lawn fertilizer at the rate of 10 lbs. per 1000 sq. ft. Grass Seed Mixture containing 95% Domestic Rye and 5% White Clover, lb. 40 cts.; 10 lbs. \$3.50; 25 lbs. \$7.50; 100 lbs. \$28.00.

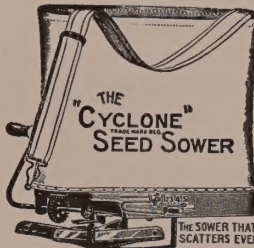

MEADOW GRASS MIXTURE

An ideal mixture for meadows and pasture. Use 100 lbs. per acre. Contains Timothy, Perennial Rye Grass, Orchard Grass and Red Clover. Lb. 75 cts.; 10 lbs. \$7.00; 25 lbs. \$17.00; 100 lbs. \$65.00.

MEADOW GRASS FERTILIZER

Fertilize your meadows and pasture areas with a complete fertilizer known as 5-10-5. It contains 5% nitrogen, 10% phosphoric acid and 5% potash. Apply as early as possible in the spring. Use 1200 lbs. per acre. 80 lbs. \$4.00; 800 lbs. \$35.00; 2000 lbs. \$77.00.

THE CYCLONE SEED SOWER

An accurate portable seeder for all broadcast sowing. Fits over the shoulder and is provided with automatic adjustment for stopping flow of contents when required. 5 lb. capacity. \$7.50.

Prices on separate grasses and field seeds are subject to market fluctuations and therefore are subject to change without notice.

Scotts Kwik to Control Chinch Bugs

These chinch bugs under glass are magnified seven times. Chinch bugs attack grass by piercing their tiny beaks into the grass stems to suck out juices. The grass wilts and turns brown. They are active in full sun only. They are especially active in hot, dry weather from early June until frost. Use Kwik to kill these insects. Small bag (treats 1000 sq. ft.) \$2.95; large bag (treats 2500 sq. ft.) \$5.95.

NEW! Scotts zephyr

for SUCCESS with ROSES

The new Scotts Zephyr is the tool you need for effective Rose care. Its enveloping atomization of Haze protects the foliage from disease and insect injury. This rust-proof tool is designed to give years of trouble-free service. Needs no oiling—no messy loading. \$14.95.

dawn

Dawn is a new, scientifically balanced Rose food—clean, granular, odorless. Start feeding when leaves first appear. Your reward will be more blooms per plant and more nearly continuous blossoming from late spring to cold weather. \$1.95 per box; 2 boxes \$3.75; 10 boxes \$17.50.

haze

Haze is a new Rose dust that is applied dry. It protects Roses from disease and insect injury. Easy to apply with Scotts Zephyr. Will treat a couple of dozen plants in less than five minutes. \$1.45 per can; 10 cans \$12.90.

SCOTT IT—YOU'VE GOT IT . . . A BETTER LAWN FOR LESS!

McARDLE'S *Perennial and Biennial Flower Seeds*

Many hardy perennials and biennials (plants that require two years to produce bloom, after which they set seed and die) are easily grown from seed. An important thing to remember is that seed should be started as early as possible in order to develop good-sized plants which will winter over easily. Seedlings of most perennials can be carried over winter with the protection of a light mulch. Most biennials, however, require covering or wintering in a coldframe, especially in exposed areas. Raising your own plants from seed is an easy and inexpensive way to develop a perennial border.

216 ACHILLEA, The Pearl. 2 ft. A vigorous perennial producing long slender stems of double white bloom from June to September. Pkt. 35 cts.; $\frac{1}{6}$ oz. 75 cts.

220 ACONITUM Napellus. 3 ft. Spikes of dark blue flowers appear in early summer. Pkt. 35 cts.

218A AGROSTEMMA Coronaria. Rose Campion, 28 in. Deep blood-red flowers with five petals. Blooms June to September. Pkt. 25 cts.; $\frac{1}{4}$ oz. 75 cts.

215 ALYSSUM saxatile compactum. 15 in. For rock and wall gardens or the foreground of perennial borders, the hardy yellow Sweet Alyssum is important. Easily grown from seed. Spring blooming. Pkt. 35 cts.; $\frac{1}{6}$ oz. \$1.00.

215A Sulphureum citrinum. 16 in. Lemon-yellow. Pkt. 35 cts.; $\frac{1}{6}$ oz. \$1.00.

220A ANCHUSA italica, Droptmore. 6 ft. An unusually tall-growing, vigorous, deep-rooted perennial with somewhat coarse foliage. The gentian-blue flowers of exquisite coloring lend themselves to arrangements. Blooms in June and July. Pkt. 35 cts.; $\frac{1}{6}$ oz. 75 cts.

220B Myosotidiflora. Forget-me-not Anchusa, 1 ft. Very good for the border or the rock garden. The blue forget-me-not-like flowers come during April and May. Pkt. 50 cts.; $\frac{1}{6}$ oz. \$1.00.

217A ANEMONE coronaria, St. Brigid, True Irish Strain. $1\frac{1}{2}$ ft. The large semi-double blooms of this choice strain make unusual cut-flowers during the winter months. Blooms during May and June. Pkt. 50 cts.; $\frac{1}{6}$ oz. 85 cts.

215B ANTHEMIS Sancti-Johannis. Yellow Marguerite, 2 ft. Daisy-like flowers of pure golden yellow. Slight aromatic odor. Blooms from July until frost. Pkt. 35 cts.; $\frac{1}{6}$ oz. 75 cts.

Asparagus

Plant as early in the spring as the soil can be prepared. Dig a trench a foot wide and as deep. Use 5 pounds of a complete fertilizer and 10 pounds of hydrated lime for each 50-foot row. Cover fertilizer with soil and set the roots 8 inches below the surface of the trench. Space them 18 inches apart, with 3 feet between rows. Cover roots with several inches of soil and firm each root well; as the shoots grow, the trench can be filled in with soil.

Grow Your Own VEGETABLES for Good Eating

Varieties of vegetables that are starred ★ are especially adapted to freezing

Vegetables to Start Early Indoors

Vegetables that can be started indoors or in the hotbed are: Artichokes, Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Celery, Eggplant, Leek, Lettuce, Parsley, Onions and Tomatoes. February 15 to March 15 is time enough for most of these vegetables. The seed may be started in flower pots, using the new sterile medium, Vermiculite, rather than soil. Individual varieties should be kept separate in each pot. The pots require less space than flats and may be handled much more easily. To insure against damping off, mix Rootone Disinfectant with the seeds at time of planting. When the seedlings are ready to be moved, they may be transplanted into flats or directly into the hotbed.

Artichoke

Plant early in a greenhouse or hotbed. Set outside in May in rows 3 feet apart, space 2 feet apart in the row. Mulch in winter. Plants usually bear the second year. The flower buds are eaten boiled or raw.

296 Green Globe. Pkt. 25 cts.; ¼ oz. 75 cts.; oz. \$2.00.

Vegetables to Start Early Outdoors

Onion Sets, Peas, Radish, Lettuce, Spinach and Parsley. These are the frostproof vegetables and can be planted as soon as the ground can be worked.

Beans, Green-Pod Bush

Plant after danger of frost has passed, and prepare the soil well. Sow in short rows at intervals of two weeks for a continuous supply. Set seed 1½ inches deep, 3 inches apart, with at least 2 feet between rows. Spray both sides of foliage with rotenone to check Mexican bean beetle. 1 pound will plant 100 feet of row.

ANNUALS for Colorful Blooms All Season

Flowers to Plant Early Indoors

Some annuals that can be started indoors or in the hot-bed are: Dwarf Dahlias, Asters, Alyssum, Verbenas, Petunias, Carnations, Salvias, Nicotiana, Ageratum, Sweet Peas, Snapdragons, Lobelias, Phlox Drummondii, and Stocks. The seed may be started in flower pots or even old coffee cans provided they are properly drained; use the new sterile medium, Vermiculite, rather than soil. Individual varieties should be kept separate in each container. Such containers require less space than flats, and may be handled much more easily. Set the container in a saucer or similar receptacle which is constantly filled with water. The pot automatically soaks up the amount of moisture required. To insure against damping off, mix Rootone disinfectant with the seeds at time of planting.

Annuals for Shade

Generally speaking, annuals are not lovers of shade. Some do well in partial shade, and as there are many such spots in gardens the following are recommended for them

Anchusa	Godetia
Balsam	Impatiens
Begonia	Nicotiana
Browallia speciosa major	Schizanthus
Clarkia	Torenia
Coleus	Vinca rosea
Cynoglossum	

343B ACROCLINIUM, Double Mixed Colors. 15 in. Double and semi-double daisy-like flowers, 2 inches across, with straw petals. Used fresh or dry for bouquets. Pkt. 35 cts.; $\frac{1}{8}$ oz. 60 cts.

GARDEN OF *Easy-to-*

Zinnias

The value of zinnias as a garden and cutflower cannot be stressed too highly. Their ease of culture, long blooming season, together with their wide range of color and varied flower forms, make them one of the most popular of all annual flowers. They last for days when cut. Be sure and try the new Burpee Hybrid Zinnias which are illustrated on page 25. The flowers are 5 inches and more across. They are now available in separate colors. The continuous blooming of Zinnias from early summer until frost make them a must for a beautiful flower garden. The plants grow 3 ft. high.

CAMELLIA-FLOWERED BEGONIAS

SUPER COLLECTION OF LARGE-FLOWERED DAHLIAS

Six Different Colors. Each Root is Labeled. **\$2.50**

In this collection we pack six outstanding varieties in the higher price range. Complete planting and growing instructions are included. Here is an opportunity to secure six leading kinds at a price much lower than they could be bought individually.

Camellia-Flowered Begonias

Especially adapted to shady areas

Bulbs may be started indoors in February or March. Plant one bulb in a 4 or 5-inch pot and cover with about 1 inch of soil. A soil mixture that contains $\frac{1}{4}$ leaf mold or peat moss and $\frac{2}{3}$ garden loam is ideal. Water sparingly until bulbs make growth.

These bulbs may also be planted directly outdoors any time after May 15. They may be set 9 or 10 inches apart. From bulbs started indoors early, you can enjoy a longer flowering period than from those planted directly outdoors. When set outside, they should be planted in a moist, shaded area.

White, Pink, Yellow, Red, Salmon, Copper

Any of above colors, 40 cts. each; \$4.50 per doz.

BEGONIAS →

Pendula or Hanging Type

Fine for hanging baskets and window boxes. Start tubers inside in March or April or directly outside after May 15. For best results give them a partially shaded location. Plant one bulb in an 8-inch hanging basket or three bulbs in a 14-inch hanging basket. Flowers are double and are available in shades of scarlet, rose, yellow, salmon, apricot and white. 60 cts. each; 6 for \$3.50; \$6.75 per doz.

POMPON DAHLIA COLLECTION

Six Different Colors **\$1.95**

Six choice pompon varieties are packed in this collection. Each root is labeled. Grow 18 inches high.

LILIUM regale (Regal Lily)

Plant bulbs 5 inches deep in spring, as early as possible. Grows 4 feet high; blooms in July. 3 for \$2.00; \$7.50 per doz.

LILIUM auratum (Gold-Banded Lily)

Plant bulbs 9 inches deep. Blooms in August and September. Grows 4 to 5 feet high. 3 for \$2.00; \$7.50 per doz.

LILIUM speciosum magnificum

Plant bulbs 8 inches deep. Blooms in August. Jumbo bulbs, 3 for \$2.00; \$7.50 per doz.

TUBEROSES →

Double Excelsior, Dwarf Pearl. 2 ft. Its exquisite fragrance and beautiful flower spikes, which are borne on long stems, make it an admirable cut-flower. \$2.00 per doz.; \$3.75 for 25; \$14.00 per 100.

PRUNING

A good rule on when to prune an established flowering shrub is that shrubs that bloom in spring on wood of the previous year's growth are pruned in late spring or early summer—that is, immediately after blooming. Those that bloom later, on growth of the current year, are generally pruned in late winter or early spring.

McArdle's High-Organic Fertilizer 10-6-4

For the very finest lawns and specimen trees. Contains 10% nitrogen, 6% phosphoric acid, 4% potash. "The best fertilizer ever made for Connecticut soil." On lawns, spread evenly at the rate of 10 lbs. per 1000 sq. ft. early in the spring and again in the fall. Spread when the grass is dry, and water thoroughly after application. For best results apply with a good fertilizer spreader. Use setting No. 7 for a Lawn Beauty Spreader, and No. 6 for a Scott Spreader. For trees, drill several holes to a depth of 20 inches with a crowbar under all of the tree branches, using 2 lbs. of McArdle's 10-6-4 for each inch of diameter on shade and evergreen trees. 25 lbs. \$2.25; 50 lbs. \$4.25; 100 lbs. \$8.00; 500 lbs. \$38.75; 2000 lbs. \$150.00.

McArdle's Town of Greenwich Grass Seed Mixture

For Sun or Shade

ESPECIALLY ADAPTED FOR THIS LOCALITY

This is the same formula that is used in the beautiful parks of the Town of Greenwich. Because of its high fescue content, it is adapted to shade and sun. Its velvety green color is outstandingly good, and its texture is very fine. The Illahee Creeping Red Fescue in this mixture helps fight crabgrass. The repeat business on this new mixture also indicates to us that those who have tried it are most satisfied with the results. Lb. \$1.00; 5 lbs. \$4.75; 25 lbs. \$22.50; 100 lbs. \$85.00.
